

CoilPAK Payoff | Customer Testimonials

I wanted to let you know how pleased we are with our recent purchase of the CoilPAKs. We purchased over 40,000 ft in different colors for a project we had in Carlyle, Illinois. Our interest was sparked when our account manager, Jeff Schaible told us about the new solutions Southwire was coming out with to create labor time savings. We saw the product first hand at your boxing event in November. My brother and I spoke with our electricians and decided to test the CoilPAKs on an upcoming job with a large wire order. We were so surprised how much easier and faster the pulls went that we decided to utilize the CoilPAKs on our next job as well. We have also looked into stocking these for our service trucks.

Thanks again.

It was the first time we had used this application on a job as typically the racks that come with 2500 foot spools of 10 gauge wire are heavy and hard to maneuver. We decided to use the CoilPAKs instead because of the much smaller footprint - 1250 ft CoilPAKs versus a regular reel. It was a night and day difference between the two with the ease of use. It feeds itself with the SIMpull jacket and eliminates the need for lube and the mess that entails. This creates the added benefit of pulling past existing wire. Overall, almost 9000 feet of wire was used on the entire job resulting in 30% of labor time savings. We also purchased the wire cart for larger pulls and we will be using this solution on all of our large jobs moving forward.
